A small masterpiece
of design and functionality.

Video receiver Agata

After Perla and Opale, discover the fascination of Agata. The new generation video receiver line from BPT is now completed with the eagerly-awaited handset model. Agata is available in audio or video receiver versions, in colour or B/W, with Basic or Building functions. All united by the great ease of use, functionality, clean design and style continuity with other BPT new generation models. One look and you will know that Agata has all the qualities to win you over.

Agata

Video receiver

Building Version

Basic Version

Specifications

- Display 3.5" LCD (Colour or B/W)
- Wall-mount with dedicated support

Product Dimensions
(WxHxD) 170x190x30,9 mm

Functions in the Basic version:

- Door lock release
- Self-connection of video from entry panels with cyclic selection
- Ringtone disabling with bright alert
- Video transfer (system X1)
- Colour saturation adjustment (contrast for the B/W version)
- Brightness adjustment
- Ringtone volume control
- 2 commands for activating auxiliary functions
- Master/Slave function (system X1)

Additional features in Building version:

- 8 calls over intercom facility (system X1)
- 5 calls over intercom facility (system 200)
- Panic button for requesting help to the Porter (system X1)

In case of a simultaneous call, audio/video communication will be activated on the receiver from which you answer, whether it is the primary (Master) or secondary (Slave), without the aid of new power supplies and cables.
