## INTRODUCTION

Milesight VMS Enterprise (ONVIF compliant) is a video management software designed for medium to large projects which can manage lots of network cameras in different locations and featured with Client/Server architecture. It fulfills your demands and expectations, with rich core functions including live view, record, E-map, event alarm and smart analytics, etc.

## DATASHEET

## KEY FEATURES

### ▶ System

- Support up to 2000 channels per system/128 channels per server/25 servers per system(The numbers given are recommended maximum).
- Support creating a VMS system by servers in different LANs.
- Support multiple system languages.
- Support multi-layer map.
- Support N+M Failover.
- Offer a user-friendly GUI for easy operation.
- Provide access to the system via Mobile video clients.

### ▶ Live View

- Support multi-monitor and 64 live view channels per monitor with main or sub streams optional.
- Support self-adaptive layout.
- Support Fisheye Dewarping&PTZ control.
- Support Camera Tour and Layout Tour.
- Support Dynamic Visualization including People Counting and Traffic Detection.

### ▶ Playback&Recording

- Support up to 64 channels synchronous or asynchronous playback.
- Support reverse and times the speed of playback.
- Support quick location & playback by tags, events.
- Support smart search of motion detection.
- Support marking different types of videos with different colors.
- Support split playback to split one video into multiple clips and play them back simultaneously.
- Support Snapshot, Audio, and Digital Zoom in Playback.
- Support lock of important Video.
- Support different recording types, including Schedule and Event.
- Support the export of videos in different formats.
- Support multiple kinds of overlays.
- Support local and NAS storage.

## ► Configuration

- Support device management and configuration, including Snapshot, Record, Audio, Talk, Digital Zoom, Fisheye Dewarping, PTZ Control, Stream Switching, Instant Playback, etc.
- Support real-time display of system and server running status, and dynamic display of resource information.
- Support custom configuration of system, server and client.

## ► Alarm

- Support event trigger like Motion Detection, VCA, Audio Alarm, External Input Alarm, Video Loss, Smart Analytics, etc.
- Support event action like Recording, Control Camera Output, Call Camera PTZ Preset, Play Sound, Send Email, Push Alarm to M-VMS Mobile App, etc.

## ► Smart Analytics

- Support VMS-end Video Analytics Events.
- Support VMS-end People Counting.
- Support ANPR Management, including License Plate Group Detection, Speed Detection, Congestion Detection, Retrograde Detection, etc.
- Support Radar Data Integration for Traffic Flow Control.

## ► Security

- Support customization of the Roles' Privileges.
- Support password protection.
- Support encrypted video files.
- Support both SSL and TLS encryption methods for emails.

## On-server AI Analytics

Advanced Motion Detection

Region Entrance

Region Exiting

Line Crossing

Loitering

Human & Vehicle Filtering

Alarm Linkage

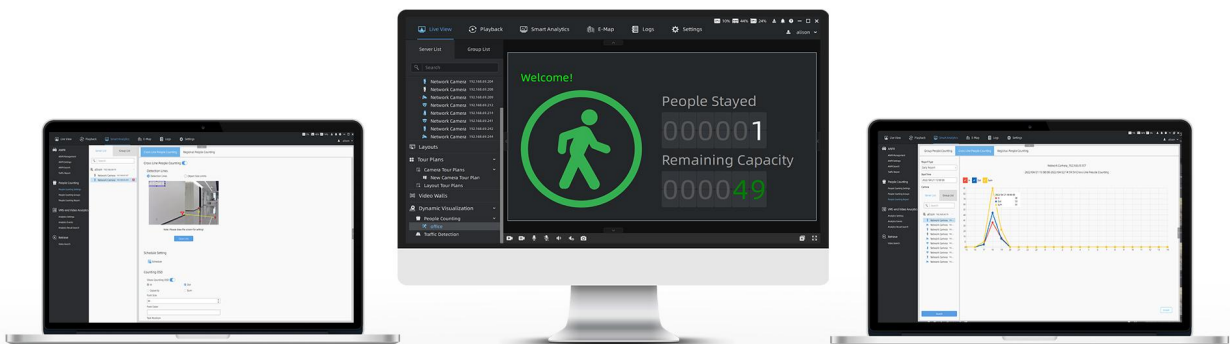

High-accuracy Detection

Alarm can be triggered in real time by various events, multiple alarm actions can be enabled at the same time.

## Support ANPR Management

## Support VMS-end People Counting

Advanced C/S Architecture · On-server AI Analytics · Intuitive Live View · Efficient Playback · Scalable Video Wall

One system manages several servers. Every server shares the same data file.

Taken over by multiple servers simultaneously. Cameras will be allocated to servers automatically to do load balancing.

Any functioning server with failover function on and valid licenses will take over the cameras of the failed server. The cameras with record on will keep recording.
