DIGITHA

Digital entry panels

The Bpt range is completed by Digitha, a stainless steel entry panel that is particularly sturdy and highly functional. With Bpt's focus on making the best possible use of internal and external space, as well as the numerous features made possible by the digital pushbutton panel, Digitha offers unparalleled performance and ultra-compact design, and the sophisticated XIP digital control system is the ideal solution for residential systems. Attractive and elegant, Digitha is pleasing to the senses, with a dual finish – brushed and matt – that will delight both the eye and the touch.

Digitha: the new generation of entry panels.

Superb video quality, day and night

The entry panels in the Digitha range feature cutting-edge technology in the form of sensors that utilize sophisticated digital image processing algorithms to give superlative video quality in any ambient conditions. In addition, the light guide system, developed jointly with the Plast Optica Research Centre (a division of FIAT's research centre), guarantees perfect night-time illumination.
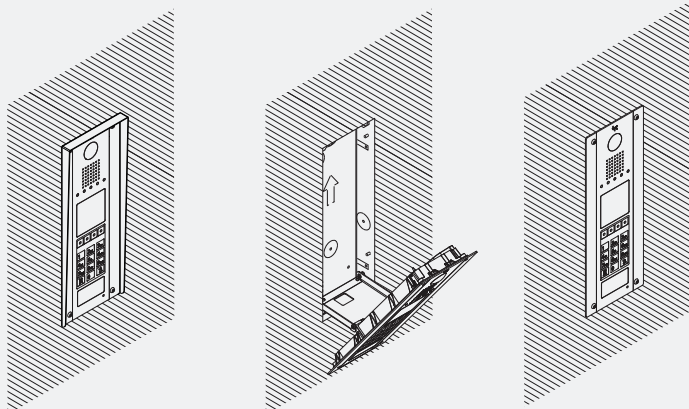

Wide viewing angle and digital adjustment of the angle of aperture

Digitha features the "wide eye" system (angle of lens aperture: 100°), which makes it possible to use the camera to display a wide field of vision (for example, from a distance of 50 cm from the entry panel, the camera can capture an image 119 cm in width and 87 cm in height). At the moment of installation of the entry panel, the horizontal angle of aperture can be reduced to as little as 72° by digitally adjusting the zoom,and the camera can be oriented in the desired direction.
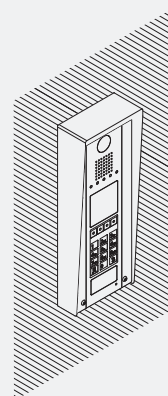

Installation

## Recessed

Wall-mounted

Simple, straightforward installation and wiring

Digitha can be recessed into a wall, protruding by just 2mm, or installed externally (thickness 42mm).

For the recessed version, it is necessary to use the embedding box and frame with rain cover; for the externally-mounted version, the wall-mount support is already fitted with the rain cover.

A choice of installation methods means that Digitha will blend beautifully into any architectural setting.
